

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing Of Claims:**

Please amend the claims as follows:

1. (Currently Amended) A method for identifying to a user [[the]] a cause of an event occurring within a personal information manager, the method comprising:  
maintaining at the personal information manager a plurality of rules comprising at least one condition and at least one action that is performed when the at least one condition is satisfied, wherein the at least one condition comprises receiving at least one electronic mail message and wherein the at least one action comprises displaying a first user interface dialog box indicating that the at least one electronic mail message has been received, wherein ~~at least one of~~ the plurality of rules ~~[[is a]]~~ comprise at least one default rule provided with the personal information manager;  
performing an evaluation to determine whether the at least one condition is satisfied, wherein performing the evaluation comprises performing the evaluation when the at least one electronic mail message has been received;  
performing the at least one action in response to determining that the at least one condition is satisfied;  
receiving a request to identify [[the]] a cause of the performance of the at least one action; and

in response to receiving the request, identifying at least one rule of the plurality of rules to the user, wherein identifying the at least one rule of the plurality of rules to the user comprises:

receiving a selection in the first dialog box identifying the at least one rule of the plurality of rules, wherein the received selection ~~being configured is~~ operative to indicate ~~the at least one of the plurality of rules~~ the user has selected the identified at least one rule of the plurality of rules for editing, wherein the at least one rule of the plurality of rules the user has selected for editing is highlighted, and

in response to receiving the selection in the first dialog box, displaying a second user interface dialog box comprising:

~~a list identifying each of~~ listing of the at least one electronic ~~message~~ messages indicating ~~which of~~ the at least one condition that has been satisfied, the listing of the at least one electronic message identifying at least one of the following: a sender of the at least one electronic message, a time the at least one electronic message was received, and a subject of the at least one electronic mail message, wherein ~~the at least one of the plurality of rules the user has selected for editing is highlighted~~ and[[,]]

a text box containing the listing [[list]], the text box configured to allow the user to edit the at least one rule of the plurality of rules that is highlighted.

2. - 3. (Canceled)

4. (Currently Amended) The method of Claim 1, wherein receiving [[a]] the request to identify the cause of the performance of the at least one action comprises receiving a selection of [[the]] a user interface object in the first dialog box.

5. (Canceled)

6. (Previously Presented) A computer-readable storage medium having stored thereon computer-readable instructions which, when executed by a computer, cause the computer to perform the method of Claim 1.

7. (Previously Presented) A computer-controlled apparatus comprising a memory operatively coupled to a processor capable of performing the method of Claim 1.

8. (Currently Amended) A method for identifying to a user [[the]] a cause of an event occurring within a personal information manager, the method comprising:  
providing within the personal information manager a facility for defining a plurality of rules related to the handling of at least one electronic mail message messages, each rule comprising at least one condition and at least one action to be performed [[if]] when the at least one condition is satisfied, wherein ~~at least one of the rules is a~~ the plurality

of rules comprise at least one default rule provided with the personal information manager;

allowing a user to define, through the facility, ~~a plurality of rules~~ at least one rule ~~of the plurality of rules operative to cause that causes~~ a first indication to be displayed in response to receiving ~~[[an]] the at least one~~ electronic mail message that satisfies ~~the~~ at least one condition associated with the defined at least one rule;

providing within the first indication ~~[[an]] a first object that may configured to be selected by a user to retrieve [[the]] an~~ identity of the at least one rule operative to have caused that caused a display of the first indication ~~to be displayed~~, wherein the first indication comprises ~~a list identifying a listing of the~~ at least one of the a plurality of electronic mail ~~message messages, the listing of the at least one electronic message~~ identifying at least one of the following: a sender of the at least one electronic message, a time the at least one electronic message was received, and a subject of the at least one electronic mail message, wherein ~~the~~ at least one of the plurality of electronic mail message messages is selectable as ~~[[a]] at least one~~ selected message, and wherein the first object may be selected is configured to retrieve the identity of ~~the~~ at least one rule of the plurality of rules that caused the first indication to be displayed for the at least one selected message, wherein the at least one rule of the plurality of rules that causes the first indication be displayed is highlighted; and

receiving a selection of the first object and, in response thereto, displaying a second indication that identifies the at least one rule, wherein the second indication further comprises ~~at least one user interface~~ a second object which, when selected,

provides a text box containing the listing ~~[[list]]~~, the text box being configured to allow the user to edit the at least one rule ~~that is highlighted~~.

9. - 11. (Canceled)

12. (Currently Amended) The method of Claim 8, wherein the first indication further comprises a third ~~user interface~~ object that, when selected, will open the at least one selected message for viewing.

13. (Currently Amended) The method of Claim 12, wherein the first indication further comprises a fourth ~~user interface~~ object which, when selected, will dismiss the first indication.

14. (Canceled)

15. (Previously Presented) A computer-readable storage medium having stored thereon computer-readable instructions which, when executed by a computer, cause the computer to perform the method of Claim 8.

16. (Previously Presented) A computer-controlled apparatus comprising a memory operatively coupled to a processor capable of performing the method of Claim 8.

17. (Currently Amended) A method for identifying to a computer user [[the]] a cause of an event occurring within an electronic mail message client, the method comprising:

storing within the electronic mail message client at least one user-defined message handling rule and at least one administrator-defined message handling rule ~~that provided by a system administrator, the at least one user-defined message~~ handling rule and the at least one system administrator-defined message handling rule being operative to generate a first indication message in response to receiving, at the electronic mail message client, ~~a plurality of at least one electronic mail message~~ messages satisfying at least one condition associated with one of the at least one user-defined message handling rule and the at least one system administrator-defined message handling rule, wherein the at least one condition is based on at least one of the following: a sender of the at least one electronic mail message, a recipient of the at least one electronic mail message, a subject of the at least one electronic mail message, and a content of the at least one electronic mail message;

receiving the ~~plurality of at least one~~ at least one electronic mail message ~~messages;~~  
in response to receiving the ~~plurality of at least one~~ at least one electronic mail message ~~messages,~~ performing an evaluation to determine if the at least one condition is satisfied by the received at least one electronic mail message ~~messages;~~

generating the first indication message in response to determining that the at least one condition is satisfied by the received at least one electronic mail message ~~messages;~~

receiving a request to identify one of the at least one user-defined message handling rule and the at least one system administrator-defined message handling rule that caused the first indication message to be displayed, wherein the request to identify the one rule that caused the first indication message to be displayed comprises displaying a user interface object containing a listing ~~list identifying each of the plurality of the at least one~~ electronic message ~~messages~~ that ~~satisfy~~ satisfies the at least one user-defined message handling rule and ~~which of the at least one user-defined message handling rule is satisfied~~; and

in response to the request, generating a second indication message identifying the one rule that caused the first indication message to be displayed, ~~wherein the rule that causes the indication be displayed is highlighted~~, wherein the second indication message further comprises a text box containing the listing ~~[[list]]~~, the listing of the at least one electronic message identifying at least one of the following: a sender of the at least one electronic message, a time the at least one electronic message was received, and a subject of the at least one electronic mail message, the text box configured to allow the user to edit the one rule that caused the first indication message to be displayed and wherein the rule that caused the first indication message to be displayed is highlighted.

18. (Currently Amended) The method of Claim 17, wherein the first indication message comprises information related to the received at least one electronic mail message.

19. - 20. (Cancelled)

21. (New) The method of Claim 1, wherein the at least one condition is based on at least one of the following: a sender of the at least one electronic mail message, a recipient of the at least one electronic mail message, a subject of the at least one electronic mail message, and a content of the at least one electronic mail message.

22. (New) The method of Claim 1, wherein the at least one action comprises at least one of the following: moving the at least one electronic message, deleting the at least one electronic message, and displaying the at least one electronic message.

23. (New) The method of Claim 8, wherein the at least one condition is based on at least one of the following: a sender of the at least one electronic mail message, a recipient of the at least one electronic mail message, a subject of the at least one electronic mail message, and a content of the at least one electronic mail message.

24. (New) The method of Claim 8, wherein the at least one action comprises at least one of the following: moving the at least one electronic message, deleting the at least one electronic message, and displaying the at least one electronic message.

25. (New) The method of Claim 1, wherein performing the evaluation to determine whether the at least one condition is satisfied comprises performing the evaluation periodically.

26. (New) The method of Claim 8, further comprising periodically evaluating the plurality of rules to determine whether the at least one condition associated with the plurality of rules has been satisfied.

27. (New) The method of Claim 17, wherein performing the evaluation to determine whether the at least one condition is satisfied by the received at least one electronic mail message comprises performing the evaluation periodically.

28. (New) The method of Claim 1, wherein the first dialog box is operative to cause a performance of at least one of the following: add a new rule to the plurality of rules, copy the at least one rule from the plurality of rules, delete the at least one rule from the plurality of rules, and execute the at least one rule of the plurality of rules.

29. (New) The method of Claim 8, wherein the first object is operative to cause a performance of at least one of the following: add a new rule to the plurality of rules, copy the at least one rule from the plurality of rules, delete the at least one rule from the plurality of rules, and execute the at least one rule of the plurality of rules.
